

# Duskin Group and NTT Group Conclude a Virtual PPA

Osaka and Tokyo (January 28, 2025) — [Duskin Co., Ltd.](#) has signed a virtual power purchase agreement (VPPA) with [NTT Anode Energy Corporation](#). Effective February 1, 2025, electricity obtained via the VPPA will be used at Duskin's two manufacturing plants. This means Duskin will be able to achieve 100% renewable energy consumption at the two sites, helping the Company to reduce its CO<sub>2</sub> emissions by 2,400 tons per year. This is the first initiative of its kind in the cleaning items rental industry.

In November 2024, Duskin set four green challenges in its [Green Vision 2050](#). To address one of the challenges—Use Green Energy—the Company will procure the environmental value (equivalent to 4.8 MW) of renewable energy generated at a non-FIT\*<sup>1</sup> solar power plant established by NTT Anode Energy, for Ono Duskin (mat manufacturing plant) and Wakura Duskin (mop manufacturing plant), through the VPPA method.

\*1 feed-in tariff

\*2 Additionality refers to the effect of promoting investment in new renewable energy facilities. In other words, creating new energy by building a new solar plant without relying on FITs or other subsidies. By introducing renewable energy with additionality, companies can not only reduce their CO<sub>2</sub> emissions but also encourage the use of more renewable energy across society.

■ About Duskin Co., Ltd.

Duskin Co., Ltd. is a leading franchisor in Japan. Our 15+ businesses range from rental and sales of cleaning and hygiene products to professional cleaning services, senior care and to donut shops.
