## Strength 1: Production, logistics and distribution system that covers the nation

Competition is minimal in this business field. To establish this recycle-oriented business model to cover the nation, a large investment is required to build the laundry plant system, to purchase materials for rental products, and to create a nationwide sales organization.

## Strength 2: Strong customer-base

A large customer base that facilitates face-to-face sales activities and includes extensive relationships between sales staff members and loyal residential customers.
